Bone marrow donors offer life saving assistance to cancer patients, The challenge of finding a suitable donor for a patient in need of therapy is complicated, time consuming, and costly. To make bone marrow donation more effective and save lives, there is a need to encourage as many people as possible to join the bone marrow registry.

Today in Connecticut, a bone marrow donor must first pay \$65 to be registered and tested. For many potential donors this is an expense that limits their participation. In New Hampshire, Rhode Island, Massachusetts, and Maine legislation to mandate insurance coverage for testing of bone marrow donors is in effect. A similar measure is needed in Connecticut. We support Senate Bill 673 and encourage its swift passage.

Sincerely,
The Students and Staff of Wethersfield High School
